

WELCOME!

We would like to welcome you and your child to Speak Freely. Thank you for choosing our services for your child. We are dedicated to providing quality therapy services in the areas of speech, language, cognition, processing, and feeding skills. We are focused on communicating expectations, outcomes, and appropriate guidelines fully with each of our families. We will often speak freely our opinions and hope that each of our families feels comfortable enough to do the same.

We are focused on treating all areas of communication in all environments that your child participates. We treat the whole child, which benefits the interactions of the entire family. We will often ask parents to observe homework and siblings to participate when it is effective for the progress of therapy. We also utilize group sessions at times to foster improvements in socialization skills for some of our clients.

Public awareness and community education are other areas that we, at Speak Freely, are dedicated to provide. We also promote and are willing to speak to other teachers, therapists, or organizations that may be involved in your child's care if you feel your child will benefit from collaboration. Overall, welcome to the Speak Freely family and please feel free to always let us know what you are thinking.

Sincerely,

The Speak Freely Team
